

## ***Our Environment***

### **A Policy Statement**

All of us recognise that our activities and operations have an environmental impact, and that we must seek to reduce it wherever we can. As an organisation, we aim to implement all reasonably practicable measures to prevent pollution to our surrounding environment, and comply with current environmental regulations, legislation, and other requirements. We also aim to continually improve our environmental performance by setting and reviewing environmental objectives and targets within the framework described in our management system.

To achieve our environmental aims, we all must:

- **Ensure that we understand, and meet or exceed, all relevant and current environmental legislation regarding our business operations;**
- **Strive to ensure that all of our wastes are handled, stored and disposed of as required by legislation;**
- **Work to reduce the amount of waste that we produce, and recycle our waste wherever feasible;**
- **Investigate measures that will reduce our consumption of resources such as electricity, gas, and water;**
- **Strive to minimise the risk of pollutant disposal to water, land and air;**
- **Provide and attend appropriate environmental training, to allow all of us to support and implement this environmental policy.**
