

# Experts in Business Technology Solutions for Energy

Enhance production performance, drive business value, meet industry standards and ensure compliance

## An Introduction

Amor Group brings over twenty years experience in Energy and combines process engineering and software development expertise with IT service skills to provide the unique offering of true industry understanding and technical excellence.

Our solutions and services are delivered by a team of over 200 experienced Energy and IT specialists with an unparalleled range of industry knowledge. This is why the majority of the world's top oil, gas and utilities companies choose to work with Amor Group. Onshore and offshore, from Brazil and Nigeria to the USA and Qatar; wherever oil and gas companies operate Amor Group can be found.

Aside from our own UK and USA offices we also benefit from our global partner network. This extended global reach, together with our outstanding track record in delivering large, complex solutions and associated services is what makes Amor Group the company of choice for leading oil and gas organisations.

## In Action

- A key Amor Group client made savings greater than \$2 million per year following 10 days offshore process optimisation consultancy
- Our pipeline management and off specification gas monitoring systems saved a major operator in excess of \$3 million in one financial year
- Our Pipeline+ systems identify leaks across hundreds of kilometers of subsea and land-based oil, gas and condensate pipelines around the globe
- Over 40% of gas coming into the UK is monitored by our systems
- For over a decade we have supported and managed the emergency shutdown system for the UK's main crude pipeline
- Over 95% of the UK's oil and gas companies choose to work with Amor Group
- Amor Group has been involved in the transition management of every UKCS asset in the last 5 years
- Amor Group assisted a leading utilities company to win an award for their approach to process safety.

“ Amor Group has in-depth technical and business expertise in hydrocarbon accounting, production reporting and pipeline management. Their energy solutions have consistently delivered tremendous value to BP in the Southern North Sea since the early 1990s. On just one occasion the allocation forecasting system saved BP several million pounds! ”

Paul Douglas, Senior Negotiator, MPO, BP

## Solutions

### Hydrocarbon+

Integrated Hydrocarbon Accounting and Production Management

### Alarm+

Alarm Management

### Simulation+

Process Plant Simulation, Training and Troubleshooting

### Pipeline+

Integrated Pipeline Management and Leak Detection

### ProcessSecurity+

Process Control Systems Security

### Operability+

Production, Systems and Safety Optimisation

### ProcessSafety+

Business Process Safety Assurance

### Trade+

Energy Trading

## Managed Services

Information Management

IT Operations Support

Data Centre

Disaster & Workplace Recovery

Hosting
