

Business Continuity

Mitigation of Risk Through Preparation

Introduction

According to a 2009 report issued by the Business Continuity Institute, over 40% of UK organisations suffered an IT related disruption in 2008. Evidence also illustrates that 43% of businesses that suffer a critical work area disaster never re-open, while a further 80% fail within 18 months of the incident occurring. These disasters come in all shapes and sizes: fire, theft, mass absenteeism, flood and storm damage, power failures, hardware or software meltdowns or even acts of terrorism.

Features

Business continuity planning is the only method of ensuring your organisation will survive major unplanned incidents. Amor Group offer the only proven dedicated disaster recovery suite for businesses in the North East of Scotland.

We provide effective business continuity support should your offices become inaccessible or your IT and communications infrastructure unusable. Amor Group's business continuity support also ensures legislative compliance and technical capabilities that safeguard investor confidence. Our business continuity services and solutions include:

- Business Continuity Planning Services
- IT Disaster Recovery Services
- Work Area Recovery Services
- Data Continuity Services
- Data Centre Services

In addition, Amor Group works in conjunction with key technology and service partners to offer clients external audit, planning facilities, project management, business continuity transportation and back up management services if required.

Benefits

Our local recovery facilities provide rapid response in the event of a disaster minimising the disruption to client business and ensuring continuity of care for your customers.

The flexible nature of our solutions and services provide clients with options to ensure up to 99.9% availability of data and applications utilising our Tier III data centre facilities and replication services. Our clients save over 50% in real terms utilising these services in comparison with internal provisions.

“ Amor Group provides us with a fully integrated workplace recovery and data back up solution that has been designed to mirror our technology and facilities. Amor Group's collaborative approach has provided us with a best fit solution allowing us to be confident that whatever the circumstances, Dana Petroleum will continue to offer superior service. ”

Phil McIntyre, Business Owner for IT, Dana Petroleum

Solution Overview

With over 20 years experience delivering managed services in the energy, transport and public service sectors we offer a proven business continuity service record.

Our replacement IT infrastructure and work area recovery facilities in the North East of Scotland offers alternative accommodation for displaced staff in the event of any major incident.
