<b>Job Description Summary (experience, education, skills, environment)</b>	<p>You must be a competent developer with sound technical knowledge, which will enhance the delivery of technical solutions to our customers.</p> <p>The key activities will be:</p> <ul style="list-style-type: none"> <li>To undertake development tasks with the minimum of supervision, including software designing, programming and testing within a Test-Driven Development process;</li> <li>To provide accurate estimates for your own development tasks;</li> <li>To assist with technical support tasks;</li> <li>To understand and apply a formal quality approach.</li> </ul> <p>You must have experience and knowledge of current .NET technologies and methodology, and hands-on experience in the following:</p> <ul style="list-style-type: none"> <li>Test-Driven Development</li> <li>C#</li> <li>ASP.NET Web Forms and/or ASP.NET MVC</li> <li>Relational databases</li> <li>Web front-end experience (e.g., HTML/CSS/JavaScript)</li> </ul> <p>An understanding of the following would also be advantageous (but is not essential):</p> <ul style="list-style-type: none"> <li>Web Services (e.g., QCF)</li> <li>SQL Server</li> <li>Oracle</li> <li>Windows Forms</li> <li>Object-relational Mappers</li> <li>Dependency Injection and AOP Framework</li> <li>SharePoint</li> <li>Microsoft Dynamics</li> <li>Windows Servers</li> <li>Software Design Patterns</li> <li>WCAG Accessibility</li> <li>JQuery</li> </ul>

The key activities will be:

- To undertake development tasks with the minimum of supervision, including software designing, programming and testing within a Test-Driven Development process;
- To provide accurate estimates for your own development tasks;
- To assist with technical support tasks;
- To understand and apply a formal quality approach.

You must have experience and knowledge of current .NET technologies and methodology, and hands-on experience in the following:

- Test-Driven Development
- C#
- ASP.NET Web Forms and/or ASP.NET MVC
- Relational databases
- Web front-end experience (e.g., HTML/CSS/JavaScript)

An understanding of the following would also be advantageous (but is not essential):

- Web Services (e.g., QCF)
- SQL Server
- Oracle
- Windows Forms
- Object-relational Mappers
- Dependency Injection and AOP Framework
- SharePoint
- Microsoft Dynamics
- Windows Servers
- Software Design Patterns
- WCAG Accessibility
- JQuery
